

<UMSL HACK>

got api?

UMSL HACK 1.5 is a 24-hour
hackathon held at UMSL
September 29th 5:00 PM
-30th 5:00 PM

Open to Traditional and
Alternative Path students

UMSL Hack 2017

Students will work in teams to create projects focused on creatively harnessing the power the of the API.

got api! Is our theme. Our goal is to see how effectively students work with existing data and interfaces to solve real problems much as they would when they come to work for you. We expect to have 125 of the best and brightest from colleges around the St. Louis Metro area.

"This is one of the best experiences at UMSL I had so far. I made a lot of friends and connections and had a great time overall."-UMSL Hack V1.0 participant

Sponsorship Prospectus

Your funds will go towards prizes, hardware, logistics, food and shirts. Because let's be honest no one was really anywhere unless they have a t-shirt to prove it happened. Sponsorship gives your company or organization access to emerging students across the metro area and provides a long-lasting reach throughout the academic STEM community. Previous sponsors have had success in recruiting future employees and creating long-lasting connections with the university. Don't forget – your sponsorship goes towards an invaluable learning experience and opportunities to inspire students in programming.

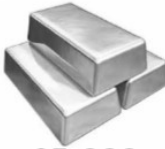

We've included a few of our sponsorship tiers below, but if you don't find one that suits your needs or you have any questions, feel free to email us at umslhack@gmail.com.

By working together, we can **Innovate the Lou** by enabling students to push their skills into results in a fun and collaborative atmosphere. We hope you'll join us in making **UMSLHack** a reality.

Let's Code!
UMSLHack Team

"I came to the event without a team. I met the people that I ended up being paired with at the event. I'd like to believe that I made some new friends as well as learned more about coding and the tools that are available for building, as well as conveying, ideas. I encourage more people to try it at least once. "

Sponsorship Tiers

	BRONZE  \$500	SILVER  \$1,000	GOLD  \$2,000	PLATINUM  \$5,000	DIAMOND  \$10,000

“This changed my life. All the idea's were fantastic. The highlight and one of the moments I will remember for the rest of my life was sitting down one on one with one of the professors and a mentor on the last day. My brain was so tired and broken at that point, I could not solve easy problems easily. Thanks to both of you. Again this changed my life. “-Chris Niehaus

Co-host

Have the best branding and be regarded as the event's co-host! Co-hosting will include all perks of the Bronze, Silver, and Gold , Platinum tiers, plus co-host tier branding on UMSLHacks promotional materials, merchandise, and social media. Our co-host will also have the opportunity to speak at the opening and closing ceremonies and do keynote and three minute API demo at the opening ceremony. And closing ceremonies.
